

Daily inspiration report, 2026-10-10

1. Summary

- Our Reels stopped getting shown once they went on a schedule. The 12 scheduled Reels of Oct 9 and Oct 10 have 35 plays in total and none has more than 9. Before that, 5 of the 9 Reels posted straight away got 140 to 581 plays each. Cause not known; it needs a look.
- Facebook and Social Blade were blocked for this job again, so there are still no competitor Reel links, view counts or posts-per-day. One hard number got through: Power of Positivity has 35.65M page likes and gains about 6,800 a day (Social Blade, Oct 1 2026).
- Very short videos are the weakest bucket on Facebook: 1 to 30 seconds gets 0.10% engagement, 30 to 60 seconds 0.18%, 2 to 3 minutes 0.25% (Socialinsider, 39M videos from 2025). Meta also does not pay on videos under 10 seconds or count views under 5 seconds. Our 15-second news Reels and short quote Reels sit at the weak end. This contradicts yesterday's CBS note that clips under 30 seconds did best.
- For news pages the money is not in Reels: across about 700 paid publisher pages, image-plus-link posts earned most and Reels earned very little

(Echobox via INMA, Dec 2025). The 50 State Wire moved from photos to Reels today.

- New niches: cooking and old recipes ties faith at the top (6.4) but is the most crowded. Relationships (6.0) is the easiest to automate. Military (6.0) is risky: Meta removed AI veteran-tribute pages in July 2026.

What could not be done: facebook.com (all variants) and almost every Social Blade page were refused for this job, and the Meta Widely Viewed Content Report opened without its content. So posts per day, caption style, video length, music and visual style are unknown for every competitor page, and no 2026 Reel could be found with a link. Page lists are candidates ranked by third-party follower counts, not by measured performance. Fix: Adin pastes competitor page and Reel links into the task (pasted links can be opened), or the scan gets a browser that renders Facebook logged out. Social Blade works at socialblade.com/facebook/user/<handle> when the link is pasted.

3. Top Reels

Motivation niche: none found with a public link (four search variants returned no facebook.com/reel link; no Reels tab could be opened). News niche: no 2026 Reel found. The only real links are the same Q3 2025 videos as yesterday (engagement, not views; none could be opened, so length, sound, text and caption style are unknown).

CBS News

Numbers: 1.2M+ engagements, top post of Q3 2025 (NewsWhip); views unknown

- What the two measurable ones share: raw footage of an animal or a rescue, where the payoff is visible in the first second.

4. Our numbers yesterday

Unpopular Truths

- Followers: 7 (same as yesterday).
- Yesterday (Oct 9, Chicago time): 8 Reels published on the plan's times, 7 AM to 10 PM.
- Plays on those 8: 12 in total. Reactions 0, shares 0, comments 0.
- Best: 'saying I love you without words' (7 AM), 4 plays, 5.5 s average watch.
- Worst: the three evening Reels (6 PM, 8 PM, 10 PM), 0 plays each.
- Today so far (Oct 10): 4 Reels out (6 to 11 AM), 23 plays in total, best 9.
- Read at 17:43 UTC on Oct 10: 15 to 30 hours after the Oct 9 Reels went public, 2 to 7 hours after today's.
- For comparison, Reels posted straight away on Oct 6 and Oct 8 (evening): 581, 571, 362, 259, 140 and 5 plays. The three posted straight away on Oct 7 have 0.
- Page totals shown by Facebook: 24 post engagements, 276 video views (the report does not say which days).
- Queued: 6 Reels, Oct 10 1 PM to 10 PM Chicago.
- Reach (unique people) is not available: the Facebook metric returns an error.

- Times are the plan's publish_at matched by caption, not the upload time.

5. New niches explored today

Cooking and old family recipes: 6.4 / 10

Sub-scores: audience 10, engagement 8, ease 5, competition 2, monetization 7 (low to medium confidence)

- Biggest audience and the best money signals, but the most crowded, and stock footage rarely matches a real dish. AI recipe pages are being called out and their recipes fail.
- Formula: One pre-1929 public-domain cookbook recipe, rewritten in our own words, ingredient stock clips, method as text cards, labelled with the cookbook and year. No AI dish photos.

Leading pages: Tasty 96M+ and 12 Tomatoes 9M (Billo, older figures); The Stay At Home Chef 8.7M, Spend With Pennies 5.3M, Melissa's Southern Style Kitchen 1.6M, The Southern Lady Cooks 1.1M (Feedspot, Aug 2026)

Relationships and marriage advice: 6.0 / 10

Sub-scores: audience 6, engagement 6, ease 9, competition 5, monetization 4 (low confidence)

- Easiest to automate and closest to what Unpopular Truths already does, so a second page would mostly repeat it. Plain quote cards are what Meta's repeated-content rule targets.
- Formula: One named research finding about couples per Reel (study shown on screen), our own 20 to 30 second script, stock couple footage, a closing question. No invented stories.

Leading pages: Focus on the Family 3.2M, YourTango 1.8M, The Gottman Institute about 965K, The Good Men Project 870.7K, Black And Married With Kids 526.5K (Feedsport, Aug to Oct 2026)

Military and veterans: 6.0 / 10

Sub-scores: audience 8, engagement 8, ease 5, competition 5, monetization 4 (very low confidence)

- Strong engagement and fast growth are possible, but this is the riskiest niche for a faceless page: Meta removed AI veteran-tribute pages in July 2026 and the press is tracking 'digital stolen valor'.
- Formula: 'On this day' military history from public archives (National Archives, DVIDS, Medal of Honor citations), source on screen, our own script. No AI people, no donation asks.

Leading pages: U.S. Army 6.1M, U.S. Navy 4.2M, U.S. Marine Corps 3.9M, Military.com 1.9M, Disabled American Veterans 1.4M, Task & Purpose about 888K (Feedsport, Aug to Oct 2026)

Scores are the average of the five sub-scores. No views or engagement could be read for any leading page, so engagement scores are inferences. Money context (low confidence, blog estimates): Reels pay most creators about \$0.02 to \$0.20 per 1,000 views; food is put at \$0.08 to \$0.30 (PostPlanify, Apr 2026). Fast growth example: an AI military page reached 113,000 followers in about three months (Futurism, Oct 4 2026) - the kind of page Meta has been removing.

Running top 5 niches

1. Faith and prayer (6.4) explored 2026-10-09

2. Cooking and old family recipes (6.4) explored 2026-10-10
 3. Pets and animal rescue (6.0) explored 2026-10-09
 4. Relationships and marriage advice (6.0) explored 2026-10-10
 5. Military and veterans (6.0) explored 2026-10-10
- Ties are ordered by ease of automation. Nostalgia (5.4) dropped out of the top 5.

6. What to upgrade on Unpopular Truths

1. Find out why scheduled Reels get almost no plays.

Evidence: 12 scheduled Reels (Oct 9 and 10): 35 plays, best 9. Posted straight away (Oct 6 and 8): 581, 571, 362, 259, 140. Oct 7's three, also posted straight away, got 0, so it is not proven.

How to test: For 3 days publish 2 of the day's Reels at once (no schedule) at the same clock times as 2 scheduled ones; compare plays after 24 hours.

2. Check whether 10 Reels a day is too many for a 7-follower page.

Evidence: Volume went from 3 a day to 8 to 10 a day on the same day plays collapsed. Socialinsider: brand pages average about 7 Reels a month; NewsWhip found no link between volume and engagement.

How to test: Run 3 Reels a day for 3 days, then compare median plays per Reel with Oct 9 and 10.

3. Make Reels 12 seconds or longer and aim to hold people past 5 seconds.

Evidence: Meta: videos under 10 seconds do not qualify for earnings and views under 5 seconds do not count. Our background clips are 8 to 20 seconds; average watch on our big Reels is 3.3 to 3.8 seconds.

How to test: Set a 12-second minimum; delay the second line to second 4 or 5 on half the Reels; compare average watch time.

4. Test one longer Reel a day (30 to 45 seconds, 4 to 5 text beats).

Evidence: Socialinsider 2026: Facebook Reels engagement rises with length, 0.20% under 30 seconds to 0.35% at 45 to 60 seconds. Brand accounts, not quote pages.

How to test: One a day for 5 days against the same day's short Reels; judge by plays and average watch.

5. Keep 'hard days' and 'the one who cares for everyone' as the lead themes.

Evidence: Still the only Reels with shares or more than 4 reactions (581 plays, 19 reactions, 3 shares; 362 plays, 8 reactions). 'Home and long love' and 'permission to rest' cannot be judged: they were barely shown.

How to test: Re-run both themes once the distribution problem is solved.

6. Put the day's best Reels at weekday midday to early evening US time.

Evidence: Sprout Social (about 2B engagements, to Feb 2026): Tue and Wed 12 to 8 PM local are strongest, weekends weakest. Our three Reels at 6, 8 and 10 PM on Oct 9 got 0 plays. Not Reels-specific.

How to test: After the fix above, compare plays by time slot over 5 days.

7. Reply to every comment when they start coming.

Evidence: Buffer 2026: pages that reply get about 9.5% more reactions. We have 0 comments so far.

How to test: No test yet; adopt as a rule.

8. Add one still quote image a day.

Evidence: Buffer has images slightly ahead of video on median engagement (5.20% vs 4.84%); Meta pays on photos and text too. Also a second route to reach if Reels stay stuck.

How to test: One image a day for 5 days; compare reach and reactions with that day's Reels.

These are suggestions for the 5-day review. This run changed no plan.

Suggestions for The 50 State Wire

1. Do not drop photo posts completely; run both for a week.

Evidence: Echobox via INMA: among about 700 paid pages, image-plus-link posts earned most and Reels very little. NewsWhip: photos were 41% of the top 1,000 publisher posts.

How to test: 3 Reels and 3 photo posts a day for 7 days; compare reach and engagement per post.

2. Try 30 to 45 second Reels with 2 or 3 cards instead of one 15-second card.

Evidence: Socialinsider (39M videos): 1 to 30 seconds is the weakest bucket (0.10%, about 500 views); 30 to 60 seconds gets 0.18%, about 820 views. All industries, not news.

How to test: Alternate lengths for 5 days; compare plays and average watch.

3. Lead each day with the animal, rescue or stranger-kindness story.

Evidence: The two biggest publisher videos of Q3 2025 were an animal clip and a rescue (NewsWhip). Today's queue already has three such stories.

How to test: Give the good-news story the midday slot; compare with the hard-news Reels.

4. Keep to US stories and keep the source line.

Evidence: The page promises 50 states; today's queue includes a world story (the Nobel Peace Prize). Visible sources set the page apart from made-up news pages.

How to test: Keep as a rule.
