Daily inspiration report

2026-10-11 | Unpopular Truths and The 50 State Wire

a. Summary: 5 takeaways

1. The 50 State Wire had its first real hit: the hurricane-deaths Reel has 730 plays, 4 reactions and 1 share on a 1-follower page, about 7.5 hours after upload. The other three Reels uploaded in the same batch have 1, 3 and 10 plays. One Reel, so a lead, not a pattern.

2. Posting by hand did not fix Unpopular Truths. The 5 Reels posted by hand on Oct 10 (about 4:35 to 4:45 PM Chicago) have 0 plays after 20 hours. The 6 scheduled ones that day have 29 plays in total. So scheduling alone is not the cause.

3. Meta's rules now name the risks our format carries. Since March 2026 Meta pushes down content it classes as unoriginal, and repeat cases can lose earnings; INMA lists three triggers seen on news pages: the same template again and again, repetitive text-and-image posts, and sudden swings in posting volume. Our volume went from 3 to 10 a day in one step. Meta does not say how quote-over-stock-footage Reels are classed.

4. Competitor pages could not be opened again (Facebook and most stats sites refused this unattended job). New hard numbers only for Fox News (37.30M likes, 6.11M 'talking about') and CNN (43.82M likes, 1.69M 'talking about'), both Social Blade, Oct 11 2026. No 2026 competitor Reel with a link or view count was found in either niche.

5. New niches: gardening and homesteading scores 6.2 and enters the running top 5 in third place. True stories and history scores 6.0 (highest engagement, but the niche most watched for fake AI history). Cars and classic trucks scores 5.6 (photo rights and an expert audience).

Limits today

What could not be done: facebook.com (all variants), most Social Blade pages, Trackalytics, the Feedspot history and truck lists and the pages' own sites were refused for this unattended job (the fetch tool only opens links that show up in a search result or are pasted into the task). The Meta Widely Viewed Content Report opened without its content. So posts per day, caption style, video length, music and visual style are still unknown for every competitor page, and page lists are ranked by third-party follower counts, not measured performance. Fix: paste the competitor page links, Reel links and socialblade.com/facebook/user/<handle> links into the task text; pasted links can be opened.

c. Top Reels

Motivation niche: none found with a public link, third day running. News niche: no Reel from Q4 2025 or 2026 with numbers was found; NewsWhip's newest Facebook ranking is still Oct 20 2025. None of the links below could be opened, so text style, length, music and caption style are unknown. One format note without a link: a CBS aurora time-lapse of about 30 seconds clearly beat a one-minute explainer on the same subject (NewsWhip, Jul 2025).

CBS News

- **Numbers:** 1.2M+ engagements, top post of Q3 2025 (NewsWhip); views unknown
- **Hook (our words):** A bear and her cubs take food from a truck in Tennessee

- **Hook (our words):** topic not confirmed for this link (new link today)
- **Footage:** video
- **Text, length, music, caption:** unknown
- **Link:** https://www.facebook.com/CBSNews/videos/979439061004755/

Fox News

- **Numbers:** in the Q3 2025 top 10 (NewsWhip); numbers unknown
- **Hook (our words):** topic not stated by the source
- **Footage:** video
- **Text, length, music, caption:** unknown
- **Link:** https://www.facebook.com/FoxNews/videos/698366109929716/

What the two measurable ones share: raw footage of an animal or a rescue, with the payoff visible in the first second.

d. Our numbers yesterday

From the Page performance report, run 38160768121 (https://github.com/adinhadza/unpop-truths/actions/runs/38160768121). Numbers only; no plan was changed.

Unpopular Truths

- Followers: 7 (same as yesterday).
- Yesterday (Oct 10, Chicago time): 11 Reels. 6 on the plan's schedule (6 AM to 3 PM) and 5 posted by hand at about 4:35 to 4:45 PM.
- Plays on those 11: 29 in total. Reactions 0, shares 0, comments 0.
- Best: 'a perfect lazy day' (7 AM), 9 plays, 5.6 s average watch.
- Worst: the 5 hand-posted Reels, 0 plays each.
- Today (Oct 11): no Reel listed yet when read at 12:42 PM Chicago.
- Read at 17:42 UTC on Oct 11: 22 to 31 hours after the scheduled Oct 10 Reels went public, about 20 hours after the hand-posted ones.
- Older Reels since yesterday's read: 'hard days' 581 to 587 plays; the rest unchanged (571, 362, 259, 140).
- Page totals shown by Facebook: 1 post engagement, 26 video views (the report does not say which days).
- Reach is not available (metric error). Other posts cannot be listed (missing 'pages_read_user_content' permission).

- Scheduled times are the plan's publish_at matched by caption. Hand-posted times are upload times; three of those five carry only a hashtag as caption, so they could not be matched to the plan.

The 50 State Wire

- Followers: 1 (0 yesterday).
- Yesterday (Oct 10): 1 Reel readable, the Nobel Peace Prize story: 152 plays, 3 reactions, 0 shares, 2.9 s average watch. It is both best and worst.
- Today so far (Oct 11): 4 Reels, 744 plays in total. The hurricane-deaths Reel has 730 of them, with 4 reactions, 1 share and 4.3 s average watch.
- Photo posts yesterday: unknown. The post list cannot be read (missing 'pages_read_user_content' permission).
- Page post engagements: 0. Page video views: 0 (as shown by Facebook; they do not match the Reel plays). Reach: not available.
- Queued: 6 photo posts, Oct 11 1:00 PM to Oct 11 8:30 PM Chicago. Three are good news (kidney donor, owl rescue, solar car park), three are hard news.
- Times below are upload times in Chicago time; there is no plan file for this page, so the real publish time may be later.

e. New niches explored today

Gardening and homesteading: 6.2 / 10

- **Sub-scores:** audience 8, engagement 6, ease 8, competition 4, monetization 5 (low confidence)
- **Verdict:** Easiest and safest of today's three, with a large loyal US audience. Main risk: wrong advice or fake-looking plant images, which this community calls out, plus Meta's push-down of plain stock clips with captions.
- **Content formula:** 'This week in your zone': one planting or chore tip by USDA hardiness zone, from USDA or extension facts in our own words, over a stock clip of the real plant, with licensed music.

True stories and history: 6.0 / 10

- **Sub-scores:** audience 7, engagement 8, ease 7, competition 3, monetization 5 (low confidence)
- **Verdict:** Highest engagement ceiling and public archives make it legally clean. Main risk: being lumped in with fake AI history pages, the niche journalists watch most; one invented detail can sink the page.
- **Content formula:** 'On this day in America': one real Library of Congress or National Archives photo with the archive credit on screen, a 60 to 90 word sourced caption, slow pan and zoom. No AI images, no invented people.

Cars and classic trucks: 5.6 / 10

- **Sub-scores:** audience 8, engagement 6, ease 5, competition 4, monetization 5 (low confidence)

- **Verdict:** Big audience, but the appeal is the exact vehicle and stock libraries are thin on specific makes and years. Main risk: photo copyright and an expert audience that punishes errors and AI fakes.
- **Content formula:** 'Truck of the day, from the archive': one public-domain period photo, year, model and three checked specs on a card, and a 'did your family own one?' question.

Pages seen

Gardening and homesteading: Epic Gardening 2.5M, Fine Gardening 1.3M, Plant Care Today 832.2K (Feedspot, Sep 14 2026); Homesteading Family 1.5M, The Prairie Homestead 676.5K (Feedspot, Jul 2 2026). True stories and history: follower counts for the leading US pages unknown (lists refused). Only cautionary examples had numbers: Historic Boston Archives about 14,000, called out by its own followers for AI videos (Boston.com, Aug 27 2026); one viral post on a fake-history page had about 9,600 likes, 1,300 comments and nearly 1,000 shares (OCCRP, Jun 2025). Cars and classic trucks: CarBuzz 5.4M, HotCars 3.5M (Feedspot, Sep 20 2026); MotorTrend 3.1M, Motor Authority 2.3M, Classic Industries 1.2M (Feedspot, Aug 20 2026). No classic-truck page found. No Facebook links were shown for any of these and none could be opened.

Scores are the average of the five sub-scores. No views or engagement could be read for any leading page, so engagement scores are judgment. Money context (low confidence, blog estimates): most Reels are put at $0.02 to $0.20 per 1,000 views, and 30 to 50% of views often do not qualify (AdaptlyPost). Also trending: 1970s to 90s 'remember when' nostalgia, already heavily AI-farmed (404 Media, Aug 2025); we scored nostalgia 5.4 on Oct 9.

Running top 5 niches

1. Faith and prayer (6.4)

2. Cooking and old family recipes (6.4)

3. Gardening and homesteading (6.2) - new today

4. Pets and animal rescue (6.0)

5. Relationships and marriage advice (6.0)

Ties are ordered by ease of automation. Military and veterans (6.0) dropped out of the top 5; True stories and history (6.0) sits just outside it.

f. What to upgrade on Unpopular Truths

1. Cut to 3 Reels a day for 3 days and hold it steady.

- **Evidence:** 11 Reels on Oct 10 got 29 plays; 3 a day on Oct 6 and 8 got 140 to 587 on five of six. INMA lists sudden volume swings as a trigger. Posting by hand at the same volume still got 0.
- **How to test:** Oct 12 to 14: 3 a day. Compare median plays per Reel with Oct 9 and 10.

2. Use the plan's question as the caption every time.

- **Evidence:** Three of the five hand-posted Reels went out with only a hashtag as caption. All five have 0 plays, so it cannot be judged alone, but it removes the comment prompt.
- **How to test:** Keep as a rule; it also lets the report match Reels to the plan.

3. Rotate 3 clearly different layouts.

- **Evidence:** Meta (Mar 2026) pushes down content it classes as unoriginal; INMA: same template across posts is a trigger; Fanpage Karma (2026): repetitive posts lose reach over time.
- **How to test:** 5 days, one layout per Reel in turn; compare plays per layout.

4. Set a 12-second minimum and hold the second line to second 4 or 5.

- **Evidence:** Meta (Mar 30 2026): views under 5 seconds do not count for earnings and videos under 10 seconds earn

nothing. Yesterday's average watch: 0.8 to 6.1 s.

- **How to test:** Half the Reels with the delayed second line; compare average watch time.

5. Test one longer Reel a day (30 to 45 seconds, 4 to 5 text beats).

- **Evidence:** One consultant's client: 12 to 15 s Reels got about 800 to 1,500 views against 11,000 for a 75 s one (Lilach Bullock, Sep 2026; an anecdote). Socialinsider showed the same direction yesterday.
- **How to test:** One a day for 5 days; judge by plays and average watch.

6. Add one still quote image a day.

- **Evidence:** Socialinsider (Sep 2026): reach rate images 1.20% against Reels 0.55%. Meta pays on photos too. A second route to reach while Reels are stuck.
- **How to test:** 5 days; compare reach and reactions with that day's Reels.

7. Keep 'hard days' and 'the one who cares for everyone' as lead themes.

- **Evidence:** Still the only Reels with shares or more than 4 reactions (587 plays, 20 reactions, 3 shares; 362 plays, 8 reactions). 'Permission to rest' cannot be judged: it was barely shown.
- **How to test:** Already under test from Oct 13 (5-day review).

f. Suggestions for The 50 State Wire

1. Lead each day with the biggest national breaking story.

- **Evidence:** Hurricane-deaths Reel: 730 plays in about 7.5 hours on a 1-follower page. Good-news Reels in the same batch: 1 and 3 plays. One day only.
- **How to test:** Tag each Reel by type for 5 days; compare median plays after 24 hours.

2. Vary the card from story to story.

- **Evidence:** INMA (2026): news pages lost earnings over the same template and repetitive text-and-image posts. Every Reel here comes from one Canva master.
- **How to test:** 2 or 3 card variants (color band, photo crop, headline position) in rotation.

3. Hold viewers past 5 seconds.

- **Evidence:** Average watch is 2.7 to 4.3 s on the Reels that were shown. Meta does not count views under 5 seconds for earnings.
- **How to test:** Put the key fact or number on screen in the first second and the place name second; compare average watch.

4. Keep the photo posts running next to the Reels.

- **Evidence:** Socialinsider: images reach 1.20% against Reels 0.55% and links 0.20%. Digiday: one publisher's Facebook earnings came mostly from photo posts. Meta is testing a cap of 2 free links a month on some pages (Press Gazette,

Oct 7 2026), so do not build on links.

- **How to test:** Already 6 a day queued; get the post-list permission so they can be measured.

Platform notes

- Scheduled against posted at once: no study or Meta statement found. Only a scheduling vendor (Nuelink) says there is no difference, with no data.
- Reels reach people mostly through recommendations, not followers, and Meta says it now shows more same-day Reels (Buffer, SocialPilot summaries of Meta statements). Good for small pages, but not a promise.
- Creator Fast Track (Meta, Mar 2026) needs 20K+ followers on another platform, so it does not apply to us. Content Monetization is still invite-only.
- Facebook's ranking now weighs comment quality more and hides, unfollows and fast scrolls count against a post (Fanpage Karma, 2026).
